TCB & FCB

FCC Approvals

Industry Canada Approvals

Notified Body for Europe

29 January 2004

SUBJECT: Certification for Industry Canada

Hi,

We now think that our approval as a product certifier for Canada will happen late next week, by 6 February and in anticipation of that event I am sending you a price list.

In order for us to accept your applications you must be considered to be competent to perform the desired measurements as:

- 1) The laboratory testing the EUT must meet our requirements, if you have submitted applications directly to IC and are currently submitting FCC applications to us there are no other requirements. If you are accredited to ISO/IEC 17025 there are no further requirements. If you are not accredited to 17025 then you must prove to us that you are capable of testing & preparing the report for the EUT in question.
- 2) For measurements where an OATS is required, the laboratory must have their OATS listed with Industry Canada.
- 3) You also must have a Canadian Agent/Maintenance facility

Other than the above, the requirements are the same as submissions to IC and are outlined in RSP-100. You can download (for free) the IC standards from the following web site:

http://strategis.ic.gc.ca/epic/internet/insmt-gst.nsf/vwGeneratedInterE/h_sf06139e.html

We are expecting that approval as a FCB will take place on or before 15 February 2004 so we will be able to approve product before the end of February.

If you want to be removed from this distribution please let me know.

Best Regards,

EMC/Radio testing and TCB/NB&CAB for worldwide certification services

USD1 = CD1.29

The following fees apply to the certification schemes available at Timco Engineering, Inc.:

*: e.g. Dual mode RSS 129 and PCS operation RSS 133

NOTES:

1. In addition to the above there will be a Certification FEE of USD35 (CD45) per Model. You must either send the fees with the job or your account MUST be current or the Certification will not be issued.
2. If applicable to the device, SAR/MPE compliance requires providing a Declaration of Compliance only Per RSS-102. The above pricing includes review of the Declaration of Compliance document only and does not include review of a SAR or MPE test report.
3. The lead-time is 3 business days and our terms are payment with the job.
4. *You are entitled to one Review & One Problem on Hold review; if it requires an additional Problem on hold there will be an additional charge of 60%.*
5. Jobs Cancelled by customer will incur an 80% fee.
6. There is an additional USD50 Charge if a third party makes the payment.
7. There will be an extra USD50 charge for test reports that are over 50 pages long.

Payments of all certification fees are due at the time the application is made, unless previous arrangements have been made, additionally your account must be in **good standing or the certification will not be issued.**
